

Year 1/2 Homework Project Activities

Can you make your own 3D paper mâché planet that could be displayed in class?

Use an app to find constellations, planets and stars in the night sky. Which constellation is the easiest to recognise? Which star is the brightest? Write about it.

**Can you learn the names of all the planets in our Solar System? Make a poster.

**With an adult, search the web for fascinating space facts and make your very own Space Fact Book.

Make a telescope from junk cardboard materials and sticky tape. Just before bedtime, use your telescope to look up at the stars. Can you see any wonderful star patterns in the sky? Grab a piece of paper and draw the pattern of stars that you spotted. Take the pattern into school to share with the class.

Visit your local library and search for space-themed books. Read and talk with an adult about the books you find.

**Ask an adult to help you find the names of all the people who have walked on the Moon. There are 12 of them!

With an adult, explore the Hubble Telescope website. Check out those amazing gallery images and videos! Create your own constellation piece of art work.

Imagine you're an astronaut completing different space missions and make a mini book about your work.

Information for children and parents

Well done on starting your homework project!

Over the next five weeks you have been tasked with completing as many of these 'Moon Zoom' inspired homework activities as possible! By the end of the half term, if you have successfully completed at least five of these you will be given a 'homework token', with your name on that will be placed into a prize draw! There are three compulsory homework activities that have a * placed next to them that you must complete over the five weeks in order for your name to be entered. Once you have completed a homework activity please date the sheet and bring it into school to share with your classmates.
